☒ County/Site Summary

☒ Case-Level Detail

☐ All County Comparison

Key Columns in Report

Summary	Column K provides placement stability rate for reporting period by site, county (ALL) and statewide for the above measure
Case-Level Detail	Column AV provides the length of the most recent placement episode for each child

Other Comments/Considerations

- The report includes children who have been documented in the Out-of-Home Placement window as having been in a placement episode at some time during the reporting period.
- Calculations in the number of placement settings do not include changes in placement where the Provider ID remains the same, such as TPR, Birthday Batch, etc.
- The calculation for the National Standard (above) is established using available data from all states and is based on data reflecting a one-year period of activity.
